Recent Requirement for Piping Design and Engineering Course

In accordance with the industry's current requirements for Piping Design Engineers, all engineers must have multiple skills piping software's and be specialized in Piping Design & Engineering with required Software. Although engineering subjects are large and extensive, recent engineering graduates may not be able to meet current industry requirements, as noted above. To fill this gap, engineers in the new trade / function must be trained and certified in the Honors Certification Program and have the equivalent of an piping design engineer with at least 1-2 years of active industrial experience. Today, specialty certification programs are considered a mandatory requirement in almost Piping Industries.

This course is according to Sanjary (SEA) Engineering Professional Certification Program , Industrial Jobs requirements and International Standards
